PROFILE

Senior Front End Developer with around ten years of experience building and leading the front end of client-facing web applications. Lead developer on multiple live products spanning payments, identity verification, events, and subscriptions, working primarily in JavaScript, Vue, Liquid, and GraphQL with Stripe, Make.com, and SendGrid integrations, and building full-stack applications with React, Tailwind, and Supabase (PostgreSQL) outside the client stack. Currently expanding into TypeScript. Known as the go-to developer for complex, hard-to-reproduce issues, with a track record of mentoring colleagues, introducing reusable processes, and building internal AI tooling and automations (Claude, n8n) that the wider team relies on daily.

EXPERIENCE

Complete Business Online — Senior Front End Web Developer

Mar 2023 – Present

Remote · Australian digital agency · Promoted from Web Developer to Senior, Nov 2025

- ◆ **Lead front-end developer** on client-facing web applications built on the company's proprietary instance-admin platform (CMS, e-commerce, and CRM) integrated with point-of-sale, using Liquid, JavaScript, Vue, CSS, and GraphQL.
- ◆ Led the front-end build of the **Nationally Coordinated Criminal History Checks (NCCHC)**, an Australian criminal background-check platform, including Stripe payments and the front end of a points-based ID and selfie verification flow, integrating the AWS Rekognition and NSS submission APIs delivered by the backend team, plus complex name-validation logic across legal name, alias, and maiden name. Live since June 2025.
- ◆ Led the front-end for the **Australian British Chamber of Commerce (ABCC)** events platform, integrating Make.com automation to sync Xero and SendGrid and surface error alerts to Slack in real time. Live since April 2024.
- ◆ Led the front-end for the **Real Estate Institute of Australia**, delivering the company's first Stripe subscription-webhook implementation alongside Make.com-driven Xero and SendGrid updates. Live since February 2026.
- ◆ Designed and built a **company-wide AI automation toolkit** (built on Claude) covering end-of-day reports, task summaries, deployment plans, and post-deployment steps, cutting the PR and deployment workflow from roughly 30 minutes to about 5 minutes and adopted by nearly the entire team for daily use.
- ◆ Diagnosed **hard-to-reproduce production issues** by instrumenting targeted logging to expose silent failures, then proposing fixes and monitoring closely post-release.
- ◆ Acted as the team's **trusted point of contact for complex support tickets**, mentored colleagues, and introduced reusable processes and standards across the development team.

Coredata Research Inc. — Web Developer

Aug 2018 – Mar 2023

In-house development team

- ◆ In-house developer focused on **LimeSurvey customisation**, building tailored survey logic and modifications primarily in JavaScript.
- ◆ Maintained the company's **WordPress websites across the AU, EU, and US regions**, keeping plugins and integrations current and stable.

QQFrance Digital Solutions Inc. — Web Developer

Aug 2016 – Apr 2018

Early-stage startup

- ◆ Built reusable **template websites** for resale using HTML, CSS, JavaScript, Bootstrap, and AngularJS.
- ◆ Established core front-end fundamentals at the start of a web development career.
